

Computer Hardware & maintenance

Objective: This paper is aimed at providing students with a comprehensive understanding of the basic components used in the basic assembly and their functions.

Unit -I:

Computer Fundamentals, Operating Systems, Application Software, GUI and CUI, verview of some Application software , Different Hardware devices, Input Devices, Processing Devices, Output Devices, Working of input and output devices, Assembling.

Unit -II:

Partitioning of Hard Drive/ SSD - Primary, Extended, Logical partitions using Partition Tools in Windows. Partitioning of Hard Drive/ SSD - Primary, Extended, Logical partitions using Partition Command prompt.

Unit - III:

Installation of Operating Systems like Windows 7, Windows 8 etc.; Installation of Several Application Software like MS- office, Introduction to Viruses; Virus definitions, Virus Detection, Prevention and. Antivirus Utilities, Installation of Various Devices and Drivers, Updating and Upgrading of System.

Unit- IV:

Knowledge of Network Topologies, Networking Devices, Transmission Media, Sharing of resources. Knowledge of Internet & Internet Network Configuration.

Ornamental Fish Culture & Management

F.M-60 5/1/10

UNIT-1:- Introduction:-

Scope of ornamental fish culture, Types of ornamental fishes (marine & fresh water), Economic importance, World trade of ornamental fish and export potential varieties of exotic and indigenous fishes.

Aquarium & Accessories:-

Principle of balanced aquarium, setting of aquarium, Accessories, Aeration & filtration unit, Food/Feed production unit.

UNIT-2:- Fish breeding and application of biotechnology & genetics in fish breeding:-

Breeding and rearing of ornamental fish, Breeding of live bearer, breeding of egg layers, Pond fish keeping, Broodstocks management, Construction of tank, Stocking.

UNIT-3:- Food, Feeding & Diseases:-

Culture of live food organism (Collection & culture of infusoria, Daphnia, Tubifex, Blood worm), Preparation of artificial feed (Formulated feed & Types of feed), Common diseases & their control measure, Bacterial, Protozoan, Fungal & Parasitic diseases & their prophylactic measures.

UNIT-4:- Management & Marketing:-

Water quality management, water filtration system- biological, mechanical and chemical. Aquarium plant management, Management (conditioning, packing, transport and Quarantine methods, Co-operatives, Networking.

UNIT-5:-Project:- (30 marks)

Life cycle, breeding and feeding behaviour of commercially important live bearers, egg layers & ornamental fishes.
Visit to ornamental fish farm (10 marks).

Suggested readings:-

1. Aquarium fishes
2. Hand book of fresh water Ornamental fishes
3. Profitable fish keeping
4. Guide to fish Breeding
5. Aquarium fish keeping
6. Aquarium management
7. Aquarium Plants

"OFFICE MANAGEMENT"

Theory marks: 50 Practical : 50 Marks

Duration : 30 hours

Learning Objective :

- To enhance the skill in Office works and leadership
- To enhance the skill in supervision and functionalities

UNIT-1: OFFICE AND ITS FUNCTION

What is business enterprise? What is an office Executive? Who are office staff? What are the most common forms of Business Organization? What are the advantages of office work? What are the categories of office career and job classification under each category? What are the specific skills requirement for office jobs? Duties and responsibility of officer staff.

UNIT-2 RECORDS MANAGEMENT

Objectives of record keeping, what is filing? What are the different types of filing system? Steps in filing, indexing: selecting the appropriate filing system, How to handling incoming and outgoing mails.

UNIT-3: DOCUMENTS AND REPORT WRITING:

Key Points to write a document: the SW-H plan for writing, steps in writing work place documents, important document to remember when editing seven layout mistakes to avoid, quick tips to write a report, Basics of Meeting

UNIT-4: SUPERVISORY SKILL & MS OFFICE

What are the skill of supervisor and how to acquire them? Functions of supervisor. Communication

Meaning: Process, communicating Tools: Types, Barriers.

MS OFFICE: Reporting in MS Word, Calculation in MS Excel, PPT for office meetings

UNIT-5: LEADERSHIP AND MOTIVATION:

Meaning and concept: Importance of leadership, qualities of a leader: relationship and differences leadership and motivation: organizational leadership, Leadership ethics-traits of and ethical leader, leadership styles- important leadership style-situational leadership- Emotional Intelligence of Leader: which leadership styles of subordinate development.

Unit-I: Introduction (CARTOGRAPHY BASIC)

- Meaning and Definition of Cartography, Cartographic Communication
- Shape of the earth (Spherical, Ellipsoidal and Geoid)
- Geographical Coordinates (Latitude and Longitude), Graticules
- Scale
- Map and need for Map, Map Projection, Toposheet

Exercise- Scale, Interpretation of Toposheets

Unit - II: GIS: Introductory Concepts

- GIS: Definition and Components (Hardware & Software)
- GIS Data (Spatial, Attribute).
- GIS Data Structure

Exercise – Identification of Spatial data, Attribute data, Integration of raster and vector data

Unit – III: Softwares

- Q-GIS(3.16)
- Arc GIS(10.0)

Exercise- Georeferencing and Digitization using Softwares

Unit – IV: Application of GIS

- Introductory Concepts of GPS (Position, Location on Earth, GCP etc.)
- Use of Cartographic Techniques through GIS (Bar, Pie, Choropleth, Choro-chromatic)
- Interpretation and Application of GIS (Land use/Land Cover, Water Resources, Forest Monitoring)

Exercise- Collection of Data through GPS, Satellite Image Interpretation

SYLLABUS: PERSONALITY DEVELOPMENT

[VALUE ADDED COURSE]

For CBCS pattern for students of Humanities & Social Science

From the Academic Session 2017-18

Duration of the course: 3 months

Objective

- To become familiar with the major models and traditions related to the study of personality and Personal growth.
- To develop the skills necessary to be able to critically evaluate and describe an individual's personality and behavior.
- To become familiar with a specific set of criteria which can be used to evaluate any theory of personality.
- The structure of the Syllabus of Personality Development would be as follows:

Unit-1: Introduction to Personality Development

- Definition and basics of Personality
- Increasing Vocabulary
- Body Language
- Preparation of Self Introduction

Unit-2

- Five stages of Personality Development
- Five areas of Personality Development
- Communication Skills

Unit-3: Techniques of Personality Development

- Introduction to Leadership
- Leadership styles

SYLLABUS: SPOKEN ENGLISH (Value Added Course)

For CBCS pattern for students of Humanities & Social Science
From the Academic Session 2017-18
Duration of the course: 3 months.

Objective

- Total shift in pedagogy from lectures oriented classes to interactive learning
- To familiarize students with the function of grammatical items used to spoken /written language
- To train students to use the language with confidence & without committing errors
- The English Communication skill is to be taught in 2nd semester for all students of Humanities & Social Sciences, to earn two credits.
- The structure of the Syllabus of spoken English would look like this-

Unit-1

1. Listening

Listening to texts, listening to CDs, Trials of a good listener

2. Pronunciation

Introduction to English phonetic Symbols consonants & Vowels with illustrations in use

3. Listening & Comprehension

Interpretation of texts based on question-answer. Interaction among students

4. Reading Skill

Techniques of reading. Reading comprehension of unseen pages
Identifying the context & the central idea

5. Vocabulary & word formation

From different texts & dictionary

Unit-2

1. Basic Grammar

Prescriptive/descriptive approaches grammaticality- acceptability -appropriateness-
grammar in context-grammar in spoken & written

2. Practice

Exercise on the use of different grammatical constructions in context,
Identification of the use of the above given grammatical devices form different texts like
newspapers, poems, stories etc.

3. Words & phrases used for conversation

Making statements, questions, order & suggestions -denying -rejecting-disagreeing-
possibility-ability, permission, obligations etc.

Unit-3

1. Dialogues

2. Public speech

3. Telephonic Conversation

ADD-ON COURSE IN SANITARY CHEMICALS

FULL MARK-50 TIME-2 hours

Course Title: Sanitary Chemicals

Course Description: This course provides an in-depth understanding of the chemical agents used in sanitation processes. Students will learn about the types, properties, applications, and safety considerations of sanitary chemicals in various industries, emphasizing effective cleaning, disinfection, and maintenance practices.

Unit 1: Introduction to Sanitary Chemicals

- Overview of sanitation and hygiene
- Importance of sanitary chemicals in public health
- Types of sanitary chemicals: detergents, disinfectants, sanitizers
- Chemical properties and characteristics relevant to sanitation

Unit 2: Applications of Sanitary Chemicals

- Cleaning protocols and procedures
- Selection criteria for different surfaces and materials
- Case studies and examples of effective sanitation practices
- Environmental considerations and sustainability in chemical use

Unit 3: Safety and Regulations

- Safety protocols for handling and storage of sanitary chemicals
- Personal protective equipment (PPE) requirements
- Regulatory frameworks and standards (e.g., EPA, FDA)
- Emergency response and spill management

Unit 4: Advanced Topics in Sanitary Chemicals

- Emerging trends in sanitation technology
- Innovations in chemical formulations
- Case studies on the role of chemicals in disease prevention
- Future directions in sanitary chemicals research and development

Course Objectives: By the end of the course, students should be able to:

- Identify and classify different types of sanitary chemicals.
- Apply appropriate sanitation techniques using chemical agents.
- Analyze safety considerations and regulatory requirements related to sanitary chemicals.
- Evaluate and recommend sanitary chemicals based on specific cleaning and disinfection needs.

- Discuss current and emerging trends in the field of sanitary chemicals.

Instructional Methods:

- Lectures and presentations
- Case studies and group discussions
- Hands-on demonstrations (where feasible)
- Guest lectures from industry experts
- Assignments and projects

Assessment Methods:

- Quizzes and exams
- Practical demonstrations
- Research papers or case studies
- Class participation and discussions

ADD ON COURSE IN FLOOR CLEANER

FULL MARK-50 TIME-2 hours

Course Title: Floor Cleaner Technology

Course Description: This course explores the science and technology behind floor cleaners, focusing on their formulation, application, effectiveness, and environmental impact. Students will gain practical knowledge of selecting, using, and evaluating floor cleaning products for various types of surfaces.

Unit 1: Introduction to Floor Cleaners

- Overview of floor cleaning and maintenance
- Types of flooring materials and their properties
- Introduction to floor cleaner formulations and ingredients
- Basic chemistry of cleaning agents: surfactants, solvents, builders

Unit 2: Formulation and Application

- Factors influencing cleaner formulation (e.g., pH, compatibility)
- Role of additives: fragrances, colorants, thickeners
- Techniques for effective application and distribution
- Hands-on demonstrations of proper cleaning techniques

Unit 3: Specialty Floor Cleaners

- Specific formulations for different floor types (e.g., hardwood, tile, carpet)
- Challenges and solutions for specialty environments (e.g., healthcare, food service)
- Case studies on effective use of specialty cleaners
- Sustainability considerations in specialty floor cleaning

Unit 4: Evaluation and Maintenance

- Performance testing and evaluation of floor cleaners
- Importance of maintenance schedules and protocols
- Cleaning equipment and tools: selection and maintenance
- Troubleshooting common cleaning problems

Course Objectives: By the end of the course, students should be able to:

- Identify different types of floor cleaners and their key ingredients.
- Formulate and recommend appropriate cleaners for specific floor types.
- Demonstrate proper techniques for applying and maintaining floor cleaners.

ADD ON COURSE IN HAND WASH

FULL MARK-50 TIME-2 hours

Course Title: Hand Wash Technology

Course Description: This course explores the principles, formulations, techniques, and importance of effective hand washing in maintaining hygiene and preventing the spread of infections. Students will learn about different types of hand wash products, their ingredients, applications, and the role of hand hygiene in public health.

Unit 1: Introduction to Hand Hygiene

- Importance of hand hygiene in disease prevention
- Historical perspective and evolution of hand washing practices
- Microbiology of hands: common pathogens and transmission routes
- Guidelines and standards for hand hygiene (e.g., WHO, CDC)

Unit 2: Hand Wash Formulations

- Types of hand wash products: soaps, hand sanitizers, surgical scrubs
- Key ingredients in hand wash formulations: surfactants, antimicrobial agents, moisturizers
- Formulation considerations: pH balance, fragrance, viscosity
- Regulatory requirements and safety considerations for hand wash products

Unit 3: Techniques and Applications

- Proper hand washing techniques: duration, friction, coverage
- Differences in hand washing techniques for healthcare settings vs. general public
- Application of hand sanitizers and surgical scrubs: techniques and best practices
- Case studies and demonstrations of effective hand hygiene protocols

Unit 4: Advanced Topics in Hand Wash Technology

- Innovations in hand wash technology: antibacterial coatings, touchless systems
- Environmental impact and sustainability considerations
- Role of education and behavior change in promoting hand hygiene
- Emerging trends and future directions in hand wash technology

Course Objectives: By the end of the course, students should be able to:

- Explain the importance of hand hygiene and its impact on public health.
- Identify different types of hand wash products and their formulations.

ADD ON COURSE IN SANITISER

FULL MARK-50 TIME-2 hours

Course Title: Sanitizer Technology

Course Description: This course provides an in-depth exploration of sanitizers, focusing on their formulations, applications, effectiveness, and safety considerations. Students will learn about different types of sanitizers, their active ingredients, regulatory requirements, and their role in maintaining hygiene and preventing the spread of infections.

Unit 1: Introduction to Sanitizers

- Importance of sanitizers in public health and hygiene
- Types of sanitizers: alcohol-based, quaternary ammonium compounds (QACs), chlorine-based, hydrogen peroxide-based
- Formulation principles: active ingredients, additives, pH balance
- Regulatory standards and guidelines for sanitizers (e.g., EPA, FDA)

Unit 2: Sanitizer Formulations and Chemistry

- Chemical properties and mechanisms of action of different sanitizer types
- Factors influencing sanitizer efficacy: concentration, contact time, application method
- Compatibility with different surfaces and materials
- Safety considerations in sanitizer formulations: handling, storage, disposal

Unit 3: Applications and Use Cases

- Best practices for sanitizer application in healthcare, food service, and other industries
- Role of sanitizers in infection control and prevention
- Case studies and examples of effective sanitizer use
- Emerging trends in sanitizer technology and formulations

Unit 4: Safety, Regulations, and Sustainability

- Safety protocols for handling and using sanitizers
- Environmental impact and sustainability considerations
- Regulatory compliance: labeling, testing, and reporting requirements
- Innovations in sustainable sanitizer formulations and packaging

Course Objectives: By the end of the course, students should be able to:

- Describe the different types of sanitizers and their applications.
- Explain the chemical principles and mechanisms of sanitizers.

ADD ON COURSE IN WATER QUALITY ANALYSIS
THEORY-40 LECTURES (1 HOUR DURATION EACH)

FULL MARK- 70

TIME-3HOURS

UNIT-I

Introduction to Hydrology and Water Quality

World water resource; water resources of India – Different ecosystem of Hydrology - Riverine, Estuarine and marine - State of water quality in India.

Water quality parameters and their interaction-physical and chemical characteristics- turbidity, color- temperature – chemical constituents, taste, color, acidity, alkalinity- CO_2 , hardness, pH- Methods of testing.

UNIT-II

Fresh Water Ecosystem and Water Pollution

Characteristics of Fresh water ecosystem - Chemistry of lakes, rivers, ponds and streams - Biological methods of Zonation - Microbial load and Aquatic biota - complete analysis - Approaches - Water cycle.

Water pollution - Causes - Industrial and Domestic effluents - Pesticides - Health Hazards - Control measures - Abatement.

UNIT-III

Water Composition Analysis and Heavy metal Testing

- (a) Water Composition analysis – Composition – Hardness testing – Chromatographic analysis – pH- Salinity testing – Ionic Composition – Minerals- Pollutants – DO, BOD, COD, EC, DTC – Nutrient Parameters- Portability of Water.
- (b) Heavy Metal testing- Types of Heavy Metals- Toxicity testing- Biological methods- Chemical methods- Microscopical methods-AAS- Spectrophotometer- CPES- Flame Photometer- Hydrocarbon testing (PAH).

UNIT-IV

Usage of Toxicity Testing

Forensic chemical toxicology- Dose and toxicity – Toxicity of metabolite – Sampling and Testing of toxins- Detection and classification – In vitro Toxicology – Methods and Assays used in vitro toxicology – Global classifications of toxicity – Health Hazards – Acute Toxicity – Environmental Hazards – Factors Influencing Toxicity – Toxicogenomics.

Toxicity Testing and Microbial Testing

- (a) Toxicity Testing- framework of environmental toxicity – toxicity testing –dose response curve, standard methods, classification of toxicity tests – design parameters for single species toxicity tests, the design of multi – species toxicity tests.
- (b) Microbial testing- Microbiological testing – Coli forms – Culture Identification – MPN test – Microscopy: Principles and Practices – Staining Methods – Water born Pathogen: Types and detection.

SYLLABUS

The certificate Course in Lighting & LED Technology imparts practical skills of different steps of LED Lighting Mechanical Assembly processes. This course deals with the fundamentals of Electronics, LED Technical Basics, Types of LED Lighting Products, processes of LED Product Assembly, Testing & inspections, material used in LED products, applicable standards for LED Products etc. The entire course is divided into 2 Parts. First part is Theory and second part is Practical.

Name Of Course : Lighting and LED Technology

Aim Of The Program : This program is aimed at training candidates for the job of a LED Light Technology in the electronics manufacturing sector. To get knowledge about mechanical assembly of any type of LED Lighting Product.

Course Duration

Theory – 30 hrs

Practical – 30 hrs

Total – 60 hrs

CONTENT	No. Of Hours
Unit – 1 : Basics of Electronics Components Basics of Electronics, Electronic Components, Integrated Circuits, Soldering Iron, Use of Soldering Iron, LED History, Working of LED, Types of LEDs, Factor affecting life of LED, Parameters of LED, Lumen Output, LED Power Sources, Measurement of LED parameters, Series and Parallel connection of LEDs	12 Hrs
Unit – 2 : LED Assembly Components of LED, LED Bulb Assembly, LED Street Light Assembly, LED panel Light Assembly, Burn in test for LED Luminary	12 Hrs
Unit – 3 : Thermal Management and Analysis Heat sink, Thermal Compound, Effect of Temperature on LED Junction, Analysis of different LED Circuits, Luminosity, Factors affecting Luminosity	6 Hrs

THEORY/PRACTICAL:

SYLLABUS

Objective:

This is a skill oriented course in the study of solar photovoltaic (PV) cells of crystalline Silicon, modules(panels), and system components; electrical circuits; PV system design and sizing for use on homes, commercial building etc.; understanding energy conversion from sunlight to electricity, and working with solar conversion equipment. This Course will give students the book knowledge and hands on experience needed to become entrepreneur / self employed.

Name of the course: Training programme on solar power technology.

Course Duration: Theory: 30 Hours,

Practical: 30 Hours.

Total 60 Hours.

CONTENT	No of Hours
Unit-I: Solar PV cell Modules(panels)-Crystalline Silicon solar cell, Array structure, Array foundation, Junction boxes	09
Unit-II: PCU(Power Conditioning Unit) Conversion from A.C to D.C, Inverter and the associated control and protection devices, Maximum power point Tracker- an interface between solar PV array and inverter to maximize solar PV array energy input into the system. Charge controller. AC charger.	12
Unit-III: Battery Bank: Container, Cover, Electrolyte, Voltage.	06
Unit-IV: Wires and cables:	03

THEORY/PRACTICAL:

SLNo	UNIT	Theory(Hours)	Practical(Hours)
01	UNIT-I	09	09
02	UNIT-II	12	12
03	UNIT-III	06	06

Add-on Course in "Herbarium Technology" – A three
month course

Theory – 50 Marks

Project – 50 Marks

Unit – I

Importance of Plants to Mankind, History of Botanical exploration in India. Needs for intensive plant explorations. Herbarium: Concept and definition. Historical development. Role of Herbaria and gardens. The changing nature of Herbarium and its future. Phytography of plants in details. Function of Herbarium and Botanic Gardens. Herbarium as conservatory of material and data, teaching and research. Different kind of Herbaria. Important Herbaria of India, World and State of Odisha. Standard abbreviation for Herbaria.

Unit – II

Botanic gardens and its functions, special kind or section of gardens. Botanical collections, purpose, kinds of field work, planning and collection trip exploration. Expedition. Preparation for study and arrangement of journey and stay. Materials or equipments. Camp arrangement. General hints and cautions. Collection of work, what to collect, field notes, write method of pressing and

drying of specimens. Collection of special groups or kinds of plants. Size of Herbarium and arrangement of specimen within pressing paper.

Unit - III

Poisoning and preservation of specimens. Mercuric Chloride, Formalin. Fumigation, Heating. Some special methods. Herbarium size. Mounting, Gluing, strapping, Herbarium labels. Identification of plants. Incorporation (filling) accession, filling of specimens. Arrangement of specimens in the Herbarium. Special arrangement. Receipt, Loan and Exchange, Despatch general instructions for Herbarium workers. Herbarium equipment. Herbarium cases, cup-board, Almirah, Racks, Mounting boards, Genus folder, Species folder slips for identification. Boxes for storing for dry fruits and seeds. Elementary idea of Botanical keys and their construction. Botanical nomenclature and type concept.

Project works

(50 Marks)

1. Collection of plant specimens with flowering and fruiting condition of various locality of Odisha with the preparation of field note books.
2. Identification up to Species with the help of local floras.
3. Preparation of herbarium with technique, proper pressing, drying, poisoning, mounting, stitching, labeling in a systematic process.
4. Maintenance of Herbarium and preservation according to Bentham & Hooker's system of classification in the Department of Botany, P.N. College (Autonomous), Khordha.
